

ABOUT MYSELF

My name is Zuleikha and now I want to tell you a little about myself. I'm 20 and I was born in Kazan. I live with my parents and with a younger brother.

That year I graduated from the Kazan Power Engineering College. After graduation, I got a job in a network company and submitted the documents the Kazan Energy University. At the moment I work as a personal computer operator. I plan to become an engineer in a few years. Therefore, I need a decent higher education and I figured I could get it here.

After reading a little about the university on the Internet, I learned that Kazan State Energy University is one of the three specialized energy universities in Russia, where there are budgetary correspondence places. Then I realized that it suits me, having entered the university, I was also pleased that I could still transfer to accelerated training. Many of my college classmates also chose this university, which brought us even closer together. Of course, I have not yet fully understood university life, but it is clearly different from college, especially with distance learning. Although I like this kind of training even more than full-time.

Summing up, I want to say that I am happy with my choice and I hope it stays that way
