

My name is Leila, I live in a city called Buinsk. It is a quiet and calm town near Kazan. Immediately after I graduated from college, I started working in the local administration. Work there as a specialist in organizational work.

From the very childhood I loved everything new, was glad to change. I love being active, playing sports and reading history.

My decision to enter KBAU was spontaneous and very quick. I liked how the students of this university strive to gain knowledge, take first places in competitions. You can select several areas, there are many of them.

I do not regret that I entered to study at this university. I like being an eternal student. I think that I will also participate in competitions in the future.
