

BAF-2-20 Tempob CH. 27.01.2024

Good day, colleagues.

A ~~little~~ little about myself.

My full name is Sergey Nikolayevich Petrov, and I am 38 years old. I am married and 2 sons. My parents are pensioners. I devote a lot of time to work. I love my job. My nature of work is traveling (here today and there tomorrow). I work in a company of the Republic of Tatarstan, as a senior master in automation of technological processes (ACS). The purpose of my admission to the Kazan Energy State institute is the desire to learn not only the practice, but also the theory of my work. Since many processes associated with automation are very difficult to

understand without theory I have completed many projects. I wish you the successful education and achieve your desired goals. Both in studies and in professional activities.
