Ex 1

- 1) When was the first machine for generating electricity created?
- 2) Who made the first electricity generating machine?
- 3) What are the two types of electric charges?
- 4) Is it true that Coulomb invented a device for measuring charges?
- 5) When was the modern theory of electricity created?
- 6) What people have made a great contribution to the use of electrical energy?

Ex 2.

The first machine for producing an electric charge was described in 1672 by the German physicist on Curricke. Charles Augustin de Coulomb invented a torsion balance to measure accurately the force exerted by electrical charges. The Dutch physicist Meelrik Anton Lorentz first advanced the electron theory which is the basis of modern electrical theory in 1892. Thomas Alva Edison, Nicola Tesla and Charles Prodeus Steinmetz made a great contribution to the use of electrical energy.
