

Saturday M 173-1-19.

ex 4.

- 1) will attend
- 2) goes
- 3) was
- 4) will not wait
- 5) didn't receive
- 6) know
- 7) were
- 8) will grow
- 9) wants
- 10) didn't realize
- 11) passes

12) are your parents proud of you when you show good result?

- 13) will be
- 14) were
- 15) come

ex-8

- 1) will determine
- 2) was produced
- 3) meeting
- 4) will carry out
- 5) had visit
- 6) leaved
- 7) are talk
- 8) is look
- 9) had read
- 10) was visited

ex 7.

- 1) getting
- 2) had been watching
- 3) was installed
- 4) will complete
- 5) was working
- 6) is organized
- 7) is saying
- 8) were having lunch
- 9) is done
- 10) were discussed

Electric power systems are used to convert other types of energy into electricity energy and transfer this energy to the place of consumption. Electricity as a power is a very cheap way to transfer energy. A typical generation system will consist of 6 stages: power plant, high stage step up transformation for long-distance transmission, power lines, step-down transformers, LAN, local substation for power supply of the consumer network.
